Continuation of Disposition of Claims: Claims pending in the application are 1-5,8-10,13-15,17-19,21-27,30-32,35-37,39-41,43-49,52-54,57-59,61-63,65 and 66.

### **DETAILED ACTION**

1. This Non-Final Office action is in response to the application filed on August 20<sup>th</sup>, 2003 and in response to the applicant's arguments/amendments filed on October 1<sup>st</sup>, 2009. Claims 1-5, 8-10, 13-15, 17-19, 21-27, 30-32, 35-37, 39-41, 43-49, 52-54, 57-59, 61-63, 65 and 66 are pending.

#### ***Response to Arguments***

2. Applicant's arguments, with respect to the rejection(s) of claim(s) 1-5, 8-10, 13-15, 17-19, 21-27, 30-32, 35-37, 39-41, 43-49, 52-54, 57-59, 61-63, 65 and 66 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 19, 21, 41, 43, 63, and 65 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 19, 21, 41, 43, 63, and 65 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. Examiner notes that not all of the terms are defined in the claims. Appropriate Correction is required.

The following is a quotation of the sixth paragraph of 35 U.S.C. 112:

Art Unit: 3693

An element in a claim for combination may be expressed as a means or step for performing a specified function without the recital of structure, material, or acts in support thereof, and such claim shall be construed to cover the corresponding structure, material, or acts described in the specification and equivalents thereof.

4. Claims 1-5, 8-10, 13-15, 17-19, 21-27, 30-32, 35-37, 39-41, 43-49, 52-54, 57-59, 61-63, 65 and 66 are rejected under 35 U.S.C. 112, sixth paragraph, as the claim limitation "the step of performing the NPV calculations" and "the step of performing the FV calculations" uses the phrase "means for" or "step for", but it is modified by some structure, material, or acts recited in the claim. It is unclear whether the recited structure, material, or acts are sufficient for performing the claimed function which would preclude application of 35 U.S.C. 112, sixth paragraph.

If applicant wishes to have the claim limitation treated under 35 U.S.C. 112, sixth paragraph, applicant is required to amend the claim so that the phrase "means for" or "step for" is clearly **not** modified by sufficient structure, material, or acts for performing the claimed function.

If applicant does **not** wish to have the claim limitation treated under 35 U.S.C. 112, sixth paragraph, applicant is required to amend the claim so that it will clearly not be a means (or step) plus function limitation (e.g., deleting the phrase "means for" or "step for").

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-5, 8-10, 13-15, 17-19, 21-27, 30-32, 35-37, 39-41, 43-49, 52-54, 57-59, 61-63, 65 and 66 are rejected under 35 U.S.C. 101 because the claimed invention is

Art Unit: 3693

not directed to a secondary statutory subject matter/class. ***Examiner notes that step (c) does not involve the performance by a computer.***

Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must be (1) tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. If neither of these requirements is met by the claim, the method is not a patent eligible process under § 101 and should be rejected as being directed to non-statutory subject matter. In addition to being tied to another statutory class, the claim should positively recite the other statutory class to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state. See *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008). Merely having "another statutory class" in the preamble and not in the body of the claim is also not sufficient to render the claim statutory.

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

The particular machine tie or particular transformation must meet two corollaries to pass the test for subject matter eligibility. First, the use of the particular machine or transformation of the particular article must impose a **meaningful limit** on the claim's scope. So, a machine tie in only a field-of-use limitation would not be sufficient. This means the machine or transformation must impose meaningful limits on the method claim's scope to pass the test. Second, the use of the particular machine or the transformation of the particular article must involve **more than insignificant "extra-solution" activity**. If the machine or transformation is only present in a field-of-use limitation or in a step that is only insignificant "extra-solution" activity, such a data gathering or outputting, the claim fails the M-or-T test, despite the presence of a machine or a transformation in the claim.

A method claim that fails to meet one of the above requirements is not in compliance with the statutory requirements of 35 U.S.C. 101 for patent eligible subject matter. Here claims 1-5, 8-10, 13-15, 17-19, 21-27, 30-32, 35-37, 39-41, 43-49, 52-54, 57-59, 61-63, 65 and 66 fail to meet the above requirements since there is neither a physical transformation nor a sufficient tie to another statutory class, such as hardware. Thus, it is unclear as to whether or not the claims are mere processes that involve purely human labor and further the claims as amended can be read as solely software per se and examiner request actual physical hardware to be used..

Appropriate correction is required.
